

Intelligence is a skill best described as “an ability to solve complex problems, to perceive and understand meaning and information”. IQ Challenge is a series of multi-discipline questions that will assess your ability to think and reason. Intelligence Quotient is the way of comparing your score with others to determine your capacity to learn. Note: The scores do not take into consideration other useful and necessary life skills such as manual and emotional intelligence.

- Stack the cards face-up.**
- Have pen and paper on hand to figure out your answers. Calculators are not permitted.**
- Set the clock for 30 minutes. Use the full 30 minutes to work on your answers; taking less time will not affect your score.**
- Carefully read the question. If you cannot figure out the answer, put the card aside and move on to the next one. If time allows, you may come back to it.**

When the time is up, compare your answers with the answers on the backs of the cards. Score 1 point for each correctly answered card. Note: If time allows asked a two-part question and you only answer one part correctly, the entire card is incorrect and you score 0 points.

Score	IQ rating	Class	Comparison
45-50	141+	Genius	2.2
39-44	131-140	Gifted	6.7
34-38	121-130	Superior	16.1
29-33	111-120	Bright	50
21-28	90-110	Average	16.1
-20	66-89	Borderline	6.7

NOTE: Not to be used as a certified IQ test. Only professionally administered tests provide valid scores.
