Bottle™

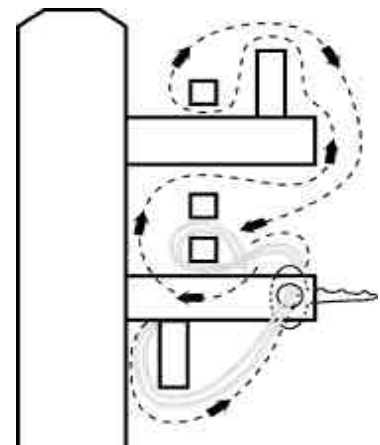

TO LOCK UP A BOTTLE

Familiarize yourself with the puzzle parts before you start then proceed as instructed.

- 1 • Adjust the wooden HANDLE so that the bottle is held securely in place between the BASE and the TOP.
- 2 • Working from the left side of the stand, slide both wooden DOWELS of the locking device through the appropriate holes located in the STAND and the handle. Make certain that the handle cannot move back and forth. The top dowels PEG should face up while the bottom dowels peg faces down.

- 3 • Working from the right side of the stand, slip the metal PIN down through the hole at the end of each wooden dowel until the hole in the pin is positioned between the two pegs. Pass the LOCK handle through the hole and press the lock shut. The bottle is now locked in place.

TO RELEASE THE BOTTLE

Follow the directional arrows with the looped end of the cord.
