

# Don't break the Bottle™

Caddy #20100

*If you're looking for a way to spark lively dinner conversation, we invite you to lock up a bottle of wine in the Don't Break the Bottle™ wine caddy. But beware: no matter what color the wine, you'll have your dinner guests seeing red as they struggle to free the bottle from this creative caddy contraption.*

Slide the metal coil contraption over the wine bottle top and slide it into the caddy as illustrated on the box cover. Close the hatch to secure the bottle into place and lock the wooden puzzle device as follows:

- 1 • Pass the attachment cord's looped end THROUGH both of the hatch rings and DOWN through Ring A.
- 2 • Slide the loop end OVER Ball B in the direction indicated.
- 3 • Pull the rope back through Ring A and UP through Ring C.

**IT SHOULD NOW LOOK LIKE THIS. ▶**

- 4 • Pass the rope through Ring A, and slide it OVER Ball B in the direction indicated.
- 5 • Pull the rope up through Ring A and create a knot end on Ring C like the one on Ring D.

**REVERSE TO REASSEMBLE.**
