

Don't break the Bottle™

Corkscrew #20101

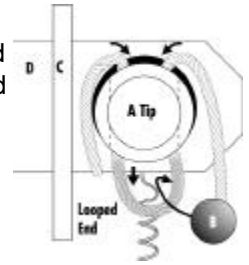

TO LOCK UP A BOTTLE

Get to know your puzzle parts. Place the bottle in the puzzle base, position "D" Cap on top of the bottle and slide "C" bar over "D" bar end, as illustrated. **Adjust the cord length by moving the knot inside "D" cap.**

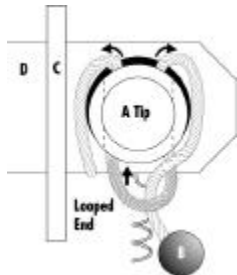

1) Place "A" bar halfway through "D" bar opening and position the cord as shown.

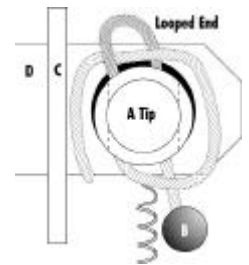

2) Push the "looped end" section of cord DOWN through the hole in the "A" bar to form a looped end at the bottom. Pass Ball "B" through the looped end.

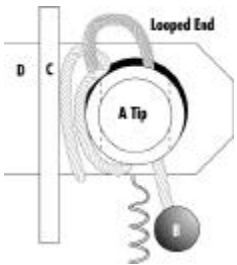

3) It should now look like this. Pull and jiggle on the cord so that the looped end comes UP through the top of the "A" bar hole.

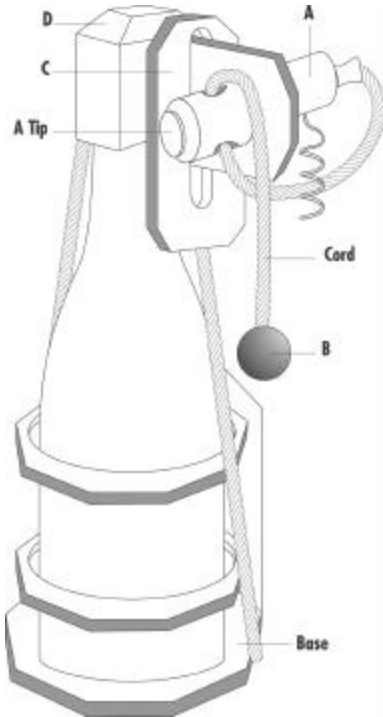

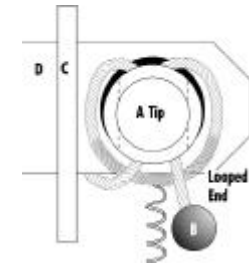

4) It should now look like this.

5) Move the cord, NOT the looped end, from the right hand side of the "A" bar, to the left hand side. It should now look like this.

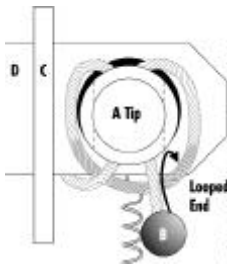

6) Pass the looped end down and OVER "A" tip. Pass Ball B to the front of the cord as shown. Your bottle is now in place.

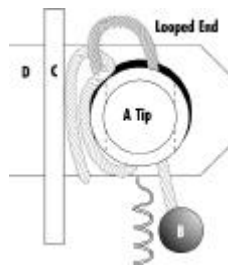

TO RELEASE THE BOTTLE

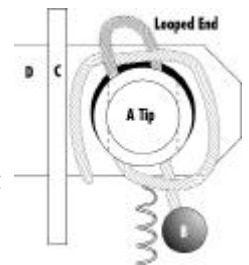

1) Pass Ball B through the looped end as shown.

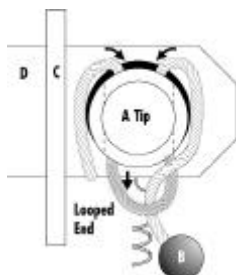

2) Pull the looped end off of the "A" tip and position as shown.

3) Move the cord, NOT the looped end, from the left hand side of the "A" bar, to the right hand side. It should now look like this.

4) Pull and jiggle on the cord so that the looped end comes DOWN through the top of the "A" bar hole.

5) Pass Ball "B" through the looped end from behind. Tug on Ball "B" to release the cord from the hole. Cheers!
