In order to replicate a 3D structure, begin by constructing the bottom layer first, show in fig. 1 next to the model you wish to build. Then, proceed to the second layer (fig. 2) and add more pieces. Continue in this manner until the construction is complete. A piece which lies flat on 1a layer is indicated only by its shape. A piece which is in a vertical arrangement is indicated by its letter and the portion of the piece which occupies the layer. Any void or space, not occupied by a piece, is indicated by solid black.
