

# Triplexity™

## OBJECT OF THE GAME

To be the first player to stack 3 of YOUR chosen colored pieces in one single stack, OR, at the top of each stack position. (SEE IMAGE)

## GAME PLAY

Each player chooses a color and puts all three of the same color pieces to the side. Decide who will play first. The first player, declaring what "position" their playing piece will occupy, (center, right, or left) places one of their pieces on the imagined playing area.

NOTE: THIS INITIAL POSITIONING OF THE FIRST PIECE PREDETERMINES THE LOCATION FOR THE OTHER TWO PLACES.

In turn, players position one piece at a time, in any of the 3 positions (center, right, or left), stacking up to a maximum of 3 high. After all 6 pieces have been placed into play, players must now move ANY top piece, no matter what the color, to any other available position. When a stack of three of the same color is formed by a player, or, when each of the three positions has the same colored piece on top, the game is over and the winner declared.

NOTE: YOU MAY NOT MOVE A PREVIOUSLY PLAYED PIECE TO ITS PREVIOUS POSITION.

## ADVANCED PLAY

At the start of the game, decide on a number of rounds to play or a total number of points to tally. Play begins in the same fashion as above. However, when all 6 pieces have been placed into play, players must take ANY top piece, INVERT it, and replace it on any other available position (center, right, or left). When a stack of three of the same color is formed, or, when each of the three positions has the same colored piece on top, the game is over and the winner's points are tallied.

## COUNTING POINTS

The playing pieces are marked with "pips". 1 pip = 1 point, 3 pips = 3 points etc. Tally the pips on all three winning playing pieces face-up side ONLY. Continue play until the decided number of rounds or points is achieved.
