

Tantrix™ Discovery

Your aim is to build loops of various shapes and sizes starting with just three tiles. Each new tile you add gives you a different and more challenging puzzle. You may not find the first loop hard...but only the best can solve all ten!

How to play

1. Turn all of the tiles upside down so numbers face upwards. Be careful not to confuse tiles 9. (dot at the bottom) and 6.
2. Turn over tiles 1,2 and 3 and make a yellow loop with them. A loop can be any closed shape, a perfect circle in this case. As you go along, the loops will have less regular shapes.
3. Break up the tiles, add tile 4, then make a new loop of 4. The colour of the number on the tile just added tells you what colour loop to make, so the 4-tile loop is red.
4. Now continue up to 10 tiles, adding one tile at a time. Each new loop must include all tiles picked up so far. All other touching colours must match as well. Remember that a loop can be any closed shape.

With less than 10 tiles, only one color of loop is possible to create.

With all 10 tiles, each color has a solution. See chart below.

The more sets of Tantrix Discovery™ you add, the higher the number you can achieve.

With 2 sets of 10 tiles, you can create a loop of up to 20, with 3 sets, up to 30...

The color on the back of tile # 4 for example, will indicate what color of loop to make when creating, 14, 24, 34 etc.

Ten Puzzles

Tiles	Colour	Time to Solve
3	Yellow	20 sec.
4	Red	40 sec.
5	Red	1 min.
6	Blue	3 min.
7	Red	6 min.
8	Blue	10 min.
9	Yellow	20 min.
10	Red	25 min.
10	Blue	28 min.
10	Yellow	30 min.
